SCH Number: 2023080439

Project Title: Water Reclamation Plant No. 7 (WRP 7) Phase 1 Non-Potable Water Improvements Project

Lead Agency / Project Applicant: Coachella Valley Water District (CVWD)
Carlos Huerta, Environmental Specialist
(760) 398-2651
75-515 Hovley Lane East
Palm Desert, CA 92211

Project Location:

The proposed Project area includes the northwest portion of CVWD's WRP 7, located south of Avenue 38 along Madison Street in the City of Indio in Riverside County, California. The Mile Post (MP) 113.2 pump station is located on the southwest corner of the Madison Street and Avenue 40 intersection. The proposed pipeline would be located in the existing roadway of Jefferson Street and on private property north of Young Way. The Project area includes seven parcels: APNs 691-100-029 and 691-100-030, which are located south of Avenue 38, north of Lindy Lane, west of Madison Street, and east of Burr Street; APN 691-180-006, which is south of Avenue 40 and west of Madison Street, adjacent to the canal; APN 691-050-021, which is at the western end of Young's Way; and APNs 691-060-010, 691-050-010, and 691-050-012, the Young's Farmland property.

Project Description:

CVWD proposes improvements to the existing tertiary treatment plant processes and an existing canal pump station at WRP 7. The Project would reduce the usage of non-potable water (NPW) from the Coachella Canal by generating additional recycled water (RW), which would benefit existing NPW/RW users in the WRP 7 service area. The WRP 7 Tertiary Treatment Improvements and MP 113.2 Pump Station Rehabilitation Project includes the following upgrades:

- Retrofit the existing dual media filter basins with cloth disk filters to improve tertiary treatment to match the rated capacity of the plant within the same footprint.
- Construct a low-pressure ultraviolet (UV) system with 12 lamps and 2 channels (100 ml/cm²) to match the rated capacity of the plant in accordance with Title 22 regulations, in an enclosed 44-foot by 61-foot building and with an electrical building to substitute use of chlorine gas.
- Abandon the existing chlorine gas system and maintain the existing chlorine contact basin for potential future use by operations for effluent/backwash holding.

Coachella Valley Water District
Notice of Determination (continued)

- Upgrade of the existing systems associated with the tertiary process includes the in-kind replacement of the following:
 - Secondary effluent flocculation system
 - Tertiary process chemical feed systems, including sodium hypochlorite storage in fiber-reinforced plastic-coated steel tanks. Includes replacement of existing feed pumps for additional capacity due to increased tertiary flows and feed piping.
 - In-plant secondary effluent, and NPW delivery pumping systems capacity increase for a 5.5 MGD system (2.5 MGD existing).
 - Tertiary Process electrical motor control centers (MCCs). A new electrical control building would house existing and new components.

CVWD is also replacing the aged infrastructure at canal water delivery pump station MP 113.2 as part of this Project. To maintain the current capacity of the pump station, the two existing pumps and MCC's are being replaced with pumps that are more efficient and require less horsepower. The motors would be approximately 10 percent more efficient, and horsepower (HP) would be reduced from 150-HP to 100-HP per pump. A third pump is being added to allow operations to perform routine maintenance while maintaining facility capacity in a typical two-duty and one-standby configuration. All improvements to the pump station are within the existing MP 113.2 site located on the southwest corner of the Madison Street and Avenue 40 intersection.

The Proposed Project would also install approximately 2,500 linear feet of NPW pipeline to connect Young's Farmland to the existing NPW pipeline on Avenue 38. Young's Farmland currently uses groundwater for irrigation. The Project would convert the primary irrigation source from groundwater to recycled water. The Young's Farmland NPW pipeline would be installed within the right-of-way of Jefferson Street and on Young's Farmland property (APN 691-060-010, 691-050-010, and 691-050-012).

This Notice of Determination is to advise that the Coachella Valley Water District's Board of Directors approved the above-described project on October 10, 2023, and has made the following determinations regarding the above-described project:

1. The Project will not have any significant effect on the environment (as explained in the previously certified FEIR/PEIR).
2. A Mitigated Negative Declaration was prepared and certified for this project pursuant to the provisions of the California Environmental Quality Act (CEQA) and reflects the independent judgement of the Lead Agency.
3. Mitigation measures were made a condition of the approval of the Project.
4. A Mitigation Monitoring and Reporting Program was adopted as part of the Project.
5. A Statement of Overriding Considerations was not adopted as part of the Project.
6. Findings of Fact were not made pursuant to the provisions of CEQA.

Coachella Valley Water District
Notice of Determination (continued)

This is to certify that the Mitigated Negative Declaration is available to the general public during normal business hours at CVWD's Steve Robbins Administration Building, located at: 75-515 Hovley Lane East, in Palm Desert, CA 92211.

Date: October 10, 2023

Sylvia Bermudez, Clerk of the Board
Coachella Valley Water District
