JOB DESCRIPTION

Coachella Valley Water District                      Date: July 2016

TITLE: Water Treatment Operator I                SECTION: Treatment

DEPARTMENT: Operations                        SRN: A-28

REPORTING RELATIONSHIP:

Supervised by: Crew Chief, Water Treatment

Supervises the following positions: Not applicable

DEFINITION: Under general direction, the core function of this position is to perform the operational activities related to the District’s T2 classified water treatment facilities. In addition, this position may be required to work on the District’s water distribution system. This position is also expected to perform related work as required with minimum direct supervision.

ESSENTIAL FUNCTIONS:

1. Learn to operate and maintain the District’s T2 Classified Ion Exchange Treatment Plants (IXTP) for the removal of Arsenic and Chromium. Perform routine checks on operational processes. Adjust operational parameters to ensure compliance with IXTP permit requirements.

2. Effectively operate, maintain, and repair District chlorination facilities located at wells, booster stations and other locations in the distribution system. Analyze the causes of malfunctions and repair or replace equipment as needed to put the chlorine system back on line with the proper residuals in the distribution system.

3. Check, titrate, and adjust chemical solutions. Make precise adjustments to chemical delivery systems.

4. Stand-by emergency response duties for after hours for treatment plant and chlorine operational emergencies.

5. Performs emergency response procedures for both the 150-pound cylinders and the one-ton containers. Participates on chlorine emergency leak response team as “first man” for both Domestic and Sanitation departments. Uses Repair Kit A, Repair Kit B, and Chlor-A-Safe unit that contains cylinder leaks.

6. Operates and maintains pumps, related flow, and pressure control devices, The Operator may be required to operate storage facilities manually or by using a supervisory control and data acquisition (SCADA) system.

7. Prepare and maintain accurate reports and records related to chlorination procedures when needed. Read and interpret plat books and blue prints.
JOB DESCRIPTION
