JOB DESCRIPTION

Coachella Valley Water District                     Date: July 2016

TITLE: Water Treatment Operator III                SECTION: Treatment

DEPARTMENT: Operations                              SRN: A-34

REPORTING RELATIONSHIP:

Supervised by: Crew Chief, Water Treatment

Supervises the following positions: This is a Senior Operator position and as such will be required to supervise Water Treatment Operators I and Water Treatment Operators II.

DEFINITION: Under general direction, the core function of this position is to perform the operational activities related to the District’s T2 classified water treatment facilities and the District’s water disinfection facilities. Acts as lead operator on the water treatment crew and fills in for the Crew Chief in their absence. In addition, this position will be required to work on the District’s water distribution system. This position is also expected to provide project leadership when required on job assignments and to do related work as required with minimum direct supervision. Assists in the training of Water Treatment Operators I & II.

ESSENTIAL FUNCTIONS:

1. Assists the Crew Chief to provide project leadership, schedule work, and order appropriate materials, and in the absence of the Crew Chief, assumes full responsibility for the crew.

2. Operate and maintain the District’s T2 Classified Ion Exchange Treatment Plants (IXTP) for the removal of Arsenic and Chromium. Perform routine checks on operational processes.

3. Adjust operational parameters to ensure compliance with IXTP permit requirements.

4. Effectively operate, maintain, and repair District chlorination facilities located at wells, booster stations and other locations in the distribution system. Analyze the causes of malfunctions and repair or replace equipment as needed to put the chlorine system back on line with the proper residuals in the distribution system.

5. Check, titrate, and adjust chemical solutions. Make precise adjustments to chemical delivery systems of these solutions.

6. Stand-by emergency response duties for after hours for treatment plant and chlorine operational emergencies.

7. Performs emergency response procedures for both the 150-pound cylinders and the one-ton containers. Participates on chlorine emergency leak response team as “first man” for both Domestic and Sanitation departments.
JOB DESCRIPTION

Water Treatment Operator III—Page 2

ESSENTIAL FUNCTIONS (CONT.):

9. Operates and maintains pumps and related flow and pressure control devices, The Operator may be required to operate storage facilities manually or by using a supervisory control and data acquisition (SCADA) system.

10. Determine and control proper chemical dosage rates for wellhead disinfection and distribution residual maintenance.

11. Investigate water quality problems in the distribution system.

12. Prepare and maintain accurate reports and records related to chlorination procedures when needed. Read and interpret plat books and blue prints.

13. Performs construction and maintenance work and other related duties as required. Operate and maintain a variety of hand and air tools.

14. Strictly adheres to District safety practices, procedures, and proper use of personal protective equipment including the self-contained breathing apparatus.

License or Certificates: Valid California Operators license issued by the State Department of Motor Vehicles. Department of Motor Vehicles driving record may influence employment or classification.

And

Possession of a Grade 2 Water Treatment Operators Certificate issued by the State Water Resources Control Board

And

Possession of a Grade 2 Water Distribution Operators Certificate issued by the State Water Resources Control Board

And

Possession of 24-hour Hazwoper certificate.

And

Possession of Hazmat (X) endorsement.

Experience: Any combination of training and experience which would likely provide the required knowledge and abilities is qualifying. A typical way would be to have five years of experience equivalent to Water Treatment Operator I or II, with a minimum of two years at the Water Treatment Operator II level.
MINIMUM QUALIFICATIONS (CONT.):

Knowledge:

1. Planning, organizing, directing, and controlling. Staffing, record keeping, and operator certification requirements.

2. Implementing regulations, Safe Drinking Water Act, Surface Water Treatment Rule, and amendments, primary contaminants, secondary contaminants, lead and copper rule, and fluoride regulations.

4. Water Treatment Processes – coagulation, flocculation, sedimentation, filtration, disinfection, demineralization, corrosion control, iron and manganese removal, fluoridation, water softening, and Ion Exchange Treatment processes.

5. Operation and Maintenance – chemical feeders, pumps and motors, blowers and compressors, water meters, pressure gauges, electrical generators, safety, and SCADA.

6. Laboratory Procedures – sampling, general lab practices, disinfectant, alkalinity, pH, Turbidity, specific conductance, hardness, fluoride, color, taste, and odor, dissolved oxygen, algae count, and bacteriological analyses.

7. Disinfection – water main and well disinfection, disinfection by-products, chlorination, chlorine curve chemistry, storage reservoir disinfection, and types of disinfectants.

8. Distribution System Design and Hydraulics – system layout, storage facilities, cross-connection and backflow devices, service connections, system mapping, assess system demand, flow rates and velocity, head loss, cavitation, water hammer, water pressure and volume, and static and dynamic pressure.

9. Drinking Water Regulations – disinfection by-product rule, lead and copper rule, MCLs, monitoring and sampling requirements, safe drinking water act, total coliform rule, and operator certification regulations.

10. Equipment Operation, Maintenance and Inspection – valves, water meters, hydrants, chemical feeders, corrosion, in-line sensors, power generators, SCADA, pump types, uses and sizes, troubleshooting and repair of pumps and motors, water horsepower, inspection of water mains, piping, storage tanks, equipment installation and repair, and wells.

MINIMUM QUALIFICATIONS (CONT.):

Abilities:
1. Communicate effectively both verbally and in writing.
2. Provide leadership to Water Quality Operators I and II, while giving support to the Crew Chief and managers.
